Bulletin n° 1

Lk 1

1.1. Wheels, Tires

1.2.2. As fact judges, the technical commission has the right to assess the compliance of tires with technical conditions.

Any modification of the tire is not allowed.

Grooving of the vulcanized tread is permitted.

If the race director has issued a "Wet Race" notice, it is allowed to use rain tires and tires cut to function as rain tires. Before the "Wet Race" order, the above-mentioned tires are not allowed to be used. From the announcement of the "Wet Race" onward, the use of rain tires is permitted until the end of the competition.

In the case of a "Wet Race", AVON, COOPER, and NOVA rain pattern may be cut from slick according to the pattern approved by the EAL Rallycross Committee (Appendix 1). According to this pattern, some grooves may be left uncut, but cutting additional grooves is prohibited. The pattern shown in the diagram is considered the maximum extent of cutting allowed.

For tires manufactured by other producers, in the case of a "Wet Race", it is allowed to extend the existing grooves to the sides of the tire through cutting. Only the pattern originally applied by the manufacturer to the tire may be cut open.

Race Organizer

Mati Kask

A handwritten signature in black ink, appearing to read 'Mati Kask', is written over a light blue horizontal line.
